

Daily Home Screening for Students

Parents: Please complete this short check each morning and report your child's information in the morning before your child leaves for school.

SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

	Temperature 100.4 degrees Fahrenheit or higher when taken by mouth. *CDC currently uses two different thresholds, 100.0 degrees F (37.8 degrees C) and 100.4 degrees F (38 degrees C) for healthcare settings and non-healthcare settings, respectively. Since infrared thermometers tend to read slightly lower than oral thermometers, TCCHD recommends a single screening threshold of 100 degrees F (37.8 degrees C).
	Sore throat
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
	Diarrhea, vomiting, or abdominal pain
	New onset of severe headache, especially with a fever

SECTION 2: Close Contact/Potential Exposure

	Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19: OR
	Had close contact (within 6 feet of an infected person for at least 15 minutes) with person under quarantine for possible exposure to SARS-CoV-2; OR
	Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as described in the Community Mitigation Framework
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline);
	Live in areas of high community transmission (as described in the Community Mitigation Framework) while the school remains open

*Note was added by the Trumbull County Combined Health District (TCCHD).
